## Case Studies in Strategic Management

Most business schools use case studies in their courses. However, these are typically based on past cases and assigned to students to solve. This book describes a new approach for teaching with case studies, which was developed and applied successfully at TUM School of Management. In this approach, student teams write and solve their own case study on a topic concerning current and future businesses. A case can thus be on their own startup or a strategic decision of existing companies. During the course, the students receive intensive coaching while selecting and developing the case topic by the course advisors as well as feedback by industry experts and executives for whom the case is actually a burning question. The authors present 17 cases covering strategic questions for startups and technology companies such as Deutsche Post, BMW, Ryanair, Lufthansa, Stadtwerke München, Fielmann, adidas, Siemens, Caribou Biosciences, eon, Airbus, Unicredit and UBS.

## **Strategic Management**

This book examines how leaders can use strategic thinking to transform their followers, organizations, and industries in the wake of societal shocks like COVID-19 that require re-balancing both leadership and business models. It is organized around a new triumvirate of strategic thinking concepts for the better normal, explained in a 3S Model: Style, Situation, and Strategic Orientation. The environment (situation) creates or deters opportunities that are pursued by leaders with the propensity (style) and the potential (strategy) to develop them. In the face of ongoing crises such as COVID-19, natural disasters, political upheaval, and climate change, the author proposes that the field of strategic management needs to rethink and update traditional frameworks in order to offer business models more applicable in a rapidly changing environment. Addressing topics such as sustainability and diversity, this pivotal text fills a gap in strategic thinking and presents illustrative examples and case studies about organizations grappling with making decisions in a dynamically different “new normal.”
